

Powerful Reliable Office IP-PBX Solutions

ProTalk Sark850 Asterisk PBX

50 user Business IP Telephony Switch
ISDN PRI - ISDN BRI - SIP - IAX
Voicemail Conferencing
Voice IVR Menus Queuing

The ProTalk Sark850 IP Telephony Switch is designed for sites with up to approximately 50 extensions. It is able to operate as a VoIP-only switch or a hybrid system supporting conventional TDM telephony circuits including Basic Rate ISDN (BRI) and Primary Rate ISDN (PRI).

Based on the popular open-source telephony Asterisk system, the ProTalk Sark850 not only includes a host of PBX features as standard, but also includes enhanced remote support and maintenance tools, enhanced high-speed optimized switching logic, expandability and integration options that ensure the highest levels of reliability and flexibility required in the 21st Century office environment.
